

Arçelik A.Ş. enters CDP (Carbon Disclosure Project) Global A List

Placing great importance on sustainability and energy efficiency, Arçelik A.Ş. has entered “The A List: The CDP Climate Performance Leadership Index 2014”, which lists the companies around the world with the highest performance in the CDP (Carbon Disclosure Project). Arçelik A.Ş. became the first Turkish company in its industry to be included in the list.

Continuing its efforts to minimize carbon emissions with its exemplary projects relating to the protection of the environment and the provision of energy efficiency during production, and with its record-breaking products, produced in line with the company vision "Respects the Globe, Respected Globally", Arçelik A.Ş. has been included in the “A List: The CDP Climate Performance Leadership Index 2014”, which lists the companies with the highest performance in the CDP (Carbon Disclosure Project) around the world. Arçelik A.Ş. has become the first company in Turkey to achieve this success in its industry.

Arçelik A.Ş. has been awarded the the prize “Carbon Disclosure Leader in Turkey” in 2012 and the “CDP Performance Leadership in Turkey” prize for 2013 by the CDP organization, which is an independent, non-profit, international organization which reports on how the climate change risks are managed by companies and which holds the largest amount of global climate change data in the world. In 2014, Arçelik A.Ş. moved one step further and achieved an A performance score, which is the highest level in CDP performance assessment, and was listed in the A list, which includes the companies with the highest performance in CDP (Carbon Disclosure Project) around the world.

Arçelik A.Ş. was awarded the A performance score as a result of the separate assessments of company operations relating to climate change within the categories of "Management and Strategy", "Risk and Opportunity Management", "Emissions Management" and "Verification".

Stating that they are continuing their efforts on the campaign against climate change, which constitutes an important risk to the future of the world and the sustainability of the company, **Levent Çakıroğlu, President of Koç Holding Durable Goods Group and Arçelik A.Ş. CEO**, said “We place great importance on environment and energy efficiency in all our processes besides our products. We participate in the "Corporate Leaders Network Turkish Climate Platform", established for leading the process of transition to a low carbon economy; and

Arçelik A.Ş.

contribute to the work towards creating an awareness on this subject, establishment of a sustainable business group and management of this subject in an effective way. We are very proud that our company's efforts in the campaign against climate change are appreciated by the most respected organizations throughout the world on this subject with the number of prizes we have been awarded.”

About CDP

CDP is an independent, non-profit, international organization which reports how the climate change risks are managed by companies and which holds the largest amount of global climate change data in the world. About 5000 organizations from approximately 60 countries throughout the world measure and declare their greenhouse gases emissions and strategies on the management of water resources and climate change by CDP in order to determine their reduction targets and improve their performances.
